

Letter Of Recommendation

To Whomever it may Concern,

I am pleased to provide this letter of recommendation for Keshav Krishna, who interned with me at the Consumer Finance - Analytics Team of DMI Finance Pvt. Ltd. on our Generative AI project. During his time with us, he demonstrated exceptional skills in working with cutting-edge AI technologies and significantly contributed to our team's efforts.

He played a crucial role in our project, which involved leveraging Large Language Models (LLMs) like Llama2, Llama3, and BERT for various finetuning experiments, which helped us enhance our model's quality and generation capabilities. Also, he showed proficiency in utilizing Docker, AWS, axolotl, and vLLM, and he demonstrated good debugging skills by patiently approaching complex issues in our data generation pipeline.

He is a talented young engineer with a strong work ethic and commitment to fulfilling project requirements. I'm confident he will bring value to any team or organization he works for.
